AFA Gallery is delighted to announce the opening of a new group show that will take place simultaneously in New York and Las Vegas. The exhibition will explore the creativity of a number of artists when confined to a 10 x 10 inch square. Over 100 new original works will be on display during the exhibition. Limited edition prints of selected works will also be available.

The tongue-in-cheek title conveys the juxtaposition of complex, technically virtuous artwork confined to a small physical space; much like the enormity and grandeur of Napoleon Bonaparte confined to a small physical form. The artists in the exhibition have accepted the challenge to express their complex artistic vision without the use of unlimited space.
